

David Hall - Hypnosis Show Requirements/Stage Plot

1. - 20 Non folding chairs
2. - Mixer Board
3. - 2 High Quality Speakers
4. - 1 or 2 Monitor Speakers

Back of stage must be flush against the wall or have a back railing. Pipe and drape is not considered a back wall

Audience:

A Stage Hypnosis show is based totally on audience participation. The Larger the audience the more successful the show can be. David wants You to have a great experience and that being said he requires an audience of **100 people or more** seated and ready to watch at the start of the show.

There must be NO Surprise shows, i.e. the guests are there to experience a hypnosis show and know about it before hand.

A Hypnosis show works best as a stand-alone entertainment rather than combined in with a variety show. PLEASE DO NOT coax, insist, embarrass, pressure, or otherwise manipulate anyone in attendance to volunteer to be hypnotized. Our stage hypnotism experience and a fundamental principle of hypnosis prove time and again that no one is hypnotizable against their will. Hypnosis is NOT something magical David does to a person without their consent. Rather, hypnosis is entirely the result of what a person allows him or herself to experience with David's expert guidance. Only sincerely willing and interested people become hypnotized; all others simply won't let it happen for them. Therefore, anyone forced will be either turned straightaway from the stage or sent back to his or her seats by David.

Hypnosis Show on Stage:

A Stage with a minimum size of 20'x30', and a minimum 10' foot floor to ceiling clearance is required. (Keep in mind this is a minimum as a larger stage is preferred.)

Hypnosis Show on Risers:

If a riser is used it must be sturdy and with no cracks in between sections. Back of risers must be flush against a wall or a back railing must be provided for the safety of the volunteers.

There should be no space between the back of the stage and the wall unless a sturdy back railing is provided. **Pipe and Drape is not considered a back wall.**

Hypnosis Show on Flat Floor: If the above stage requirements can not be provided, the show can be performed on a ground floor with out a stage or risers. However it must be in an open area that is visible by all audience members. For example: a gymnasium floor, or ballroom dance floor.

Chairs:

20 chairs, **Stacking Type Banquet Armless Chairs** (not folding chairs as audience members can get pinched when they are side by side) Chairs must be arranged in an arc towards the center of the stage. Please see the above diagram for stage plot.

Sound: (David does have the ability to bring sound upon request please contact him for details)

- 1.- 2 high quality speakers
- 2.- Minimum of 1 monitor speaker facing the stage; but 2 is preferred.
- 3.- Mixer board to plug in a Microphone and iPod

David will be bringing a wireless handheld microphone and iPod to be plugged into your system. The Plug in requirements for each unit are: Microphone: this has a XLR to XLR output and this cable must be able to be plugged into you mixer board.

iPod: David's iPod will be controlled by a wireless remote with a range of 100 feet. the closer the mixer board or the plug in for the iPod can be the better, David will plug this in, with a , RCA red and white 1/8 inch audio cable or a XLR channel using a passive Direct Box which he will bring.

Sound is very important to the success of the show so it is very important to have a sound professional that is familiar with your system arrive at least 60 mins prior to the show for a sound check.

If for any reason you feel as if you cannot meet these requirements please contact David Hall at 857-445-1434

I understand/agree to the above requirements for this show: _____
